

TENFOLD SECURITY

The Truth About Penetration Testing

Next Generation Penetration Testing

Ongoing, regular tests that adapt to changes in your environment

Tests all aspects of your business, network, systems & people

External, Internal, Cloud, Partners, Vendors & Physical

Executed using the tools, techniques and tactics of your adversaries

Validated results with prioritized remediation plans

Budget sensitive & saves time

vs.

Traditional Penetration Testing

One time events, typically performed annually

Only focused on one piece of your business or network

Focused on external (internet) facing devices

Executed using cyber security industry tools and techniques

Often yield inaccurate & outdated results with no remediation

Extremely expensive & time consuming with inaccurate results

Tenfold Security Next Generation Testing Platforms give you the power, experience & expertise you need to protect your business.

“If you know your enemy and yourself, you need not fear the result of a hundred battles”

Sun Tzu, The Art of War
